

Joan Njoroge

Automation and Prompt Engineer

+254745071010

kalura.n.joan@gmail.com

Summary

Results-driven Automation Specialist, Prompt Engineer, Web Developer, and Game & App Developer with experience building AI-powered solutions, scalable web applications, and intelligent automation systems. Proficient in using advanced AI platforms including Claude, Gemini, and Codex for prompt engineering, AI-assisted development, workflow optimization, and software innovation. Skilled in full-stack development, API integrations, and creating modern digital products focused on performance, functionality, and user experience. Portfolio: [kafura0@github.io](https://kafura0.github.io)

Experience

AI automation engineer

JOAT Kenya, Nairobi

Oct 2025 — Current

At JOAT Kenya, I lead innovative projects at the intersection of technology, gaming, and automation. My role involves designing and developing interactive games, creating seamless automation workflows, and building scalable software solutions that enhance user experiences. I leverage AI tools and modern programming languages, game engines, and automation tools to transform ideas into practical digital solutions, while continuously exploring emerging technologies to drive innovation.

- AI tools: Claude code(Anthropic), Gemini, OpenRouter
- Game development: concept design, mechanics, UI/UX, and deployment.
- Automation: streamlining processes using software tools and custom scripts.
- Full-stack development: building robust and scalable applications.
- Problem-solving: integrating creative solutions to complex technical challenges.

Web development and robotics teacher-EduTechAI

Smart brains Kenya, Nairobi, Kenya

May 2024

- Design and implement engaging lesson plans that cover both basic and advanced coding topics.
- Teach a range of programming languages (HTML/CSS, JavaScript, Arduino) and software development practices.
- Evaluate student progress and provide helpful feedback to facilitate skill improvement.
- Foster a supportive classroom environment that encourages teamwork and creativity.
- Stay informed about the latest developments in technology and coding to enhance the curriculum.
- Organize coding projects, competitions, and workshops to promote hands-on learning.

Education

Flatiron School Data Science Course, Nairobi, Kenya, Apr 2023

Moringa school

BSc (HONS): COMPUTER SCIENCE AND ARTIFICIAL INTELLIGENCE, Nottingham, United Kingdom, Aug 2015 — Aug 2019

University of Nottingham

KCSE, Nairobi, Kilimani, Nairobi, Kenya, Dec 2008 — Nov 2012

St. Georges Girls School

Skills

- Claude Code(Anthropic)
- ChatGPT(Codex)
- Prompt Engineering
- Workflow Automation
- Natural Language Processing
- Analytical Thinking
- Python Scripting
- Process Optimization
- AI Model Tuning
- API Integration

PROJECTS

AI content creation engine - Oct 2025 - Present

Built a multi-client social media content engine powered by **Claude** (text) and **Google Gemini 2.5 Flash** (images) via OpenRouter.

Create a client profile once. Generate viral, brand-consistent social media posts with AI images instantly — via API, dashboard, or automated n8n workflow.

Multi-tenant online store/ POS/ Business analytics system - Dec 2025 - Present

A self-hosted, multi-tenant headless commerce engine that lets African SMEs launch branded online stores, accept local payments, manage their business, and grow with analytics-driven intelligence.

BI Platform — AI-Powered Business Intelligence SaaS - mar 2026 - Present

A production-grade, multi-tenant BI platform where businesses upload data, auto-generate dashboards, and query insights using natural language AI.
